

REACT Fellowship: Credits & Academic Recognition

The **REACT Fellowship** is a deeply immersive, real-world learning program built to complement and expand traditional education. While it does not confer a formal degree or diploma, its design is aligned with **national credit frameworks** and **global best practices in experiential learning**—making it both academically meaningful and future-ready.

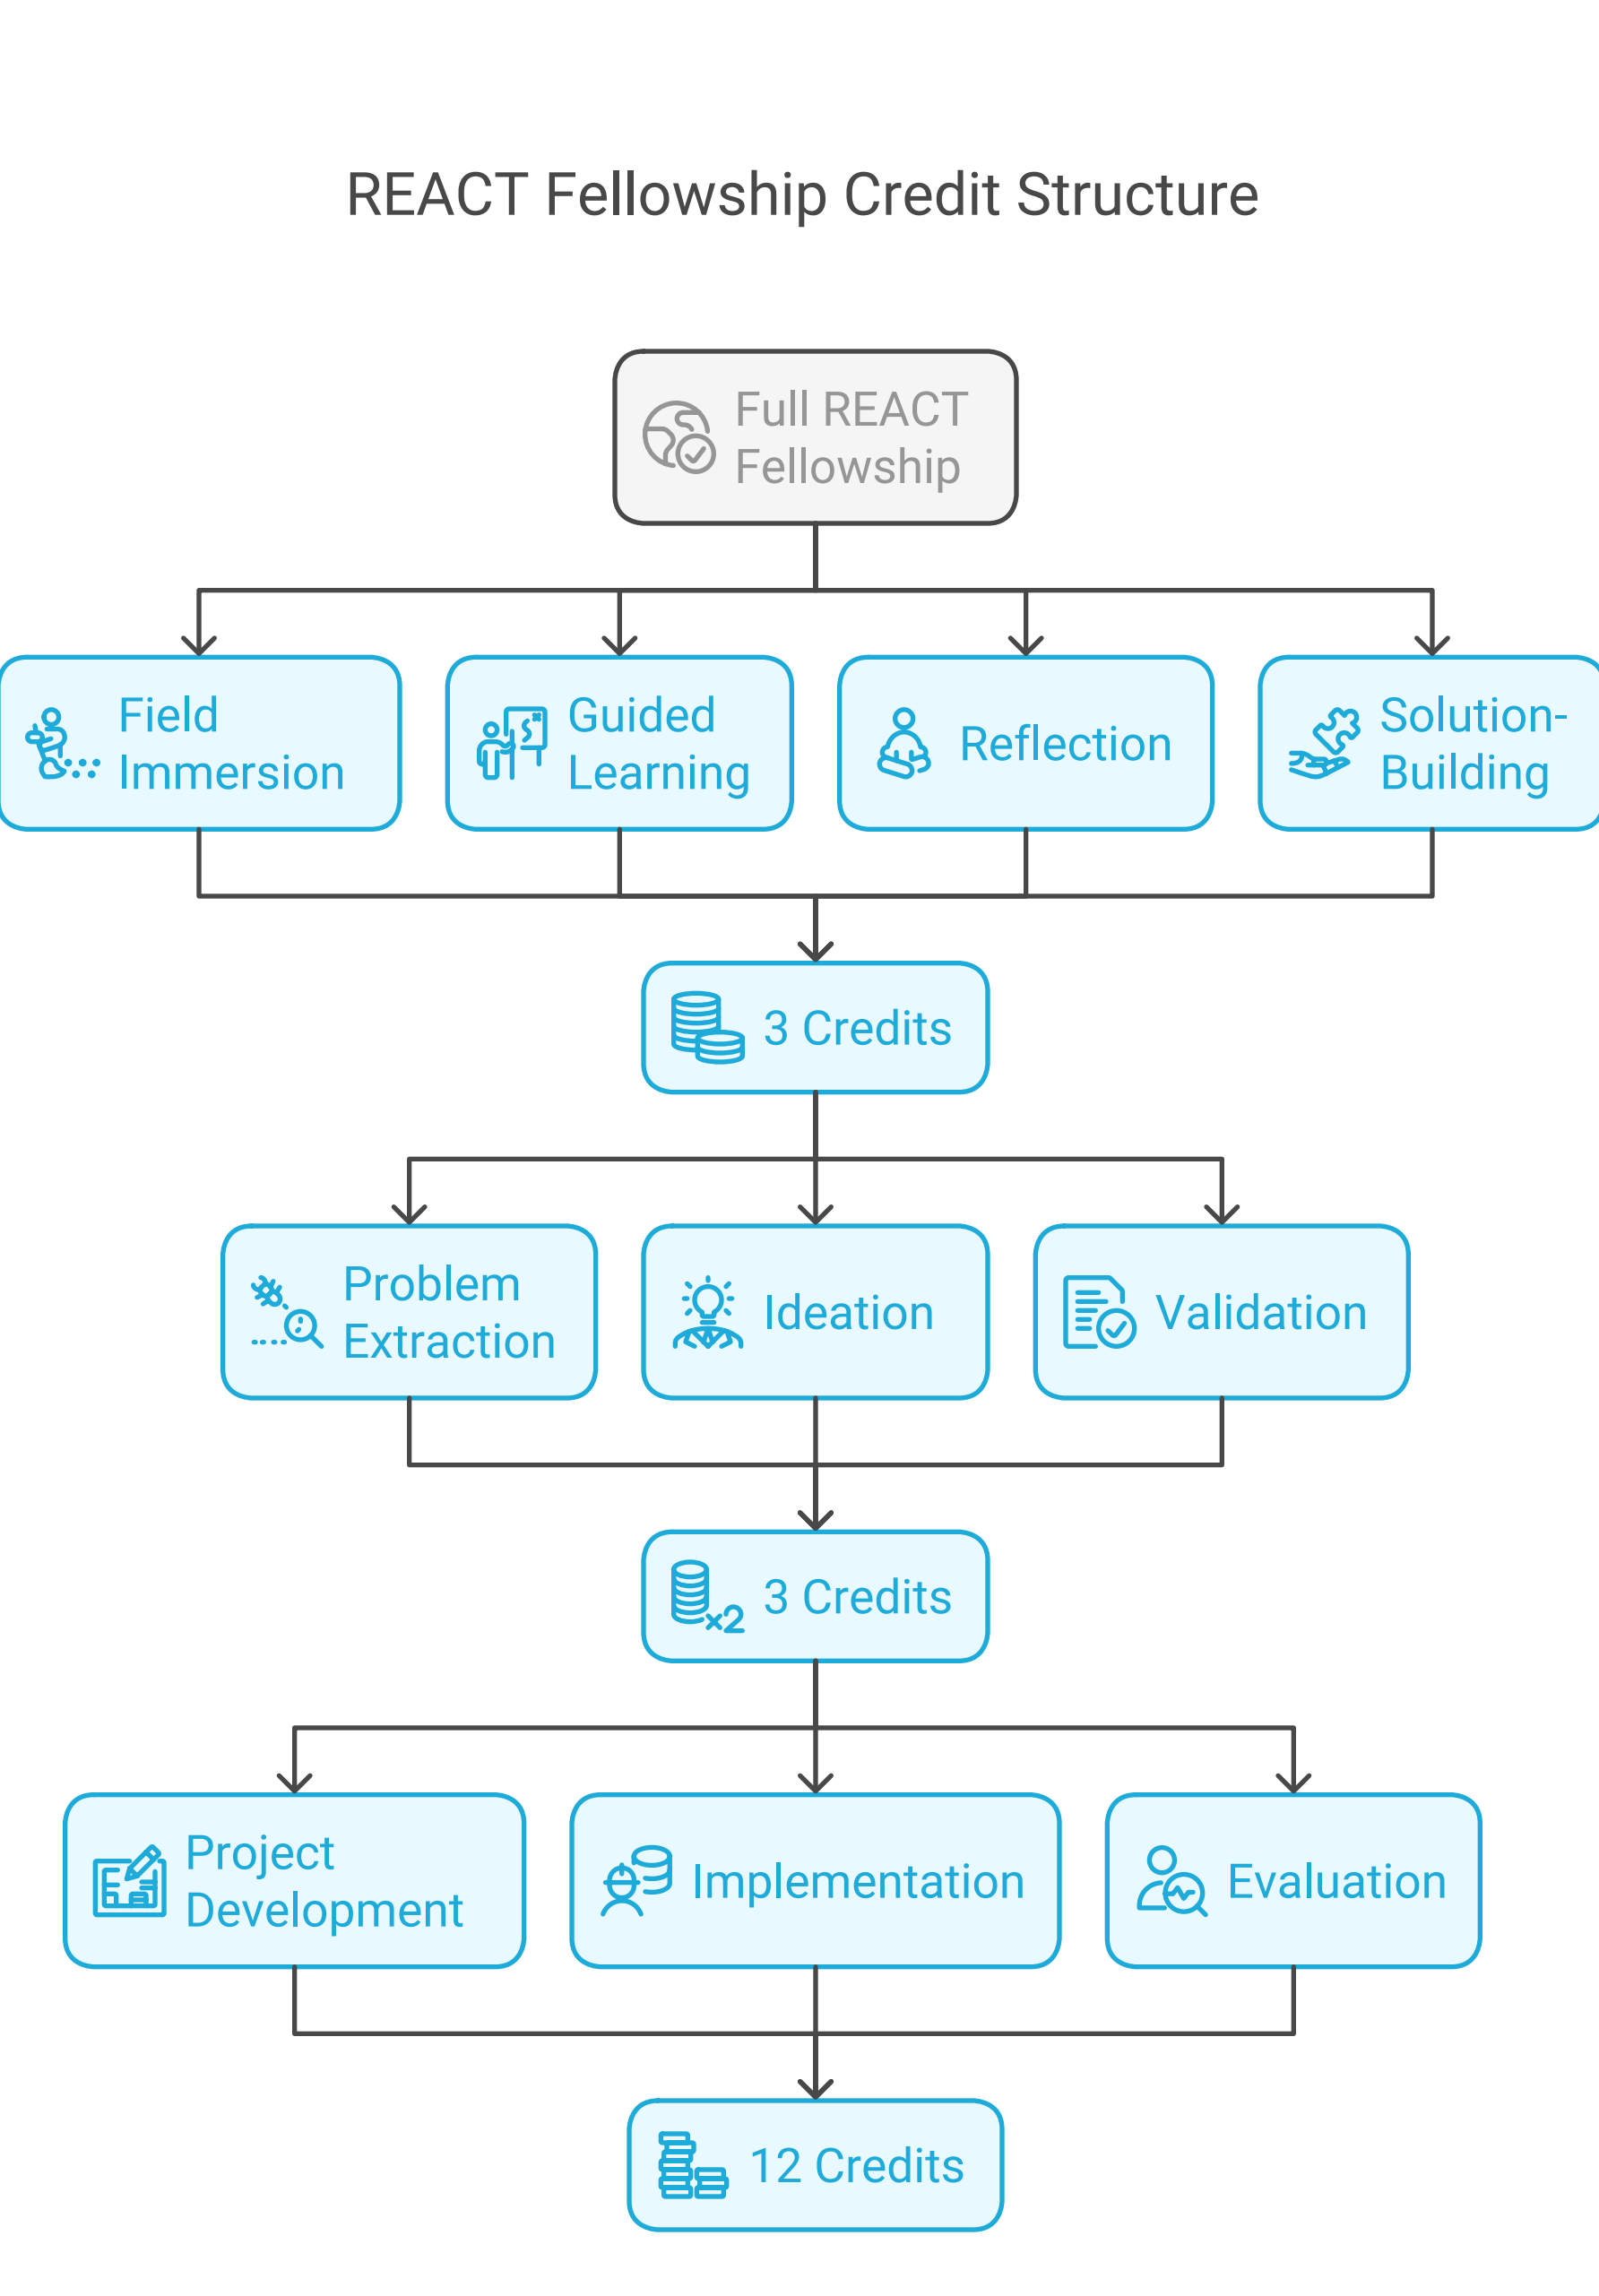

REACT Credit Structure
The full REACT Fellowship is equivalent to **18 REACT credits**, each representing **45 to 60 hours** of:

- Field immersion
- Guided learning
- Reflection
- Solution-building

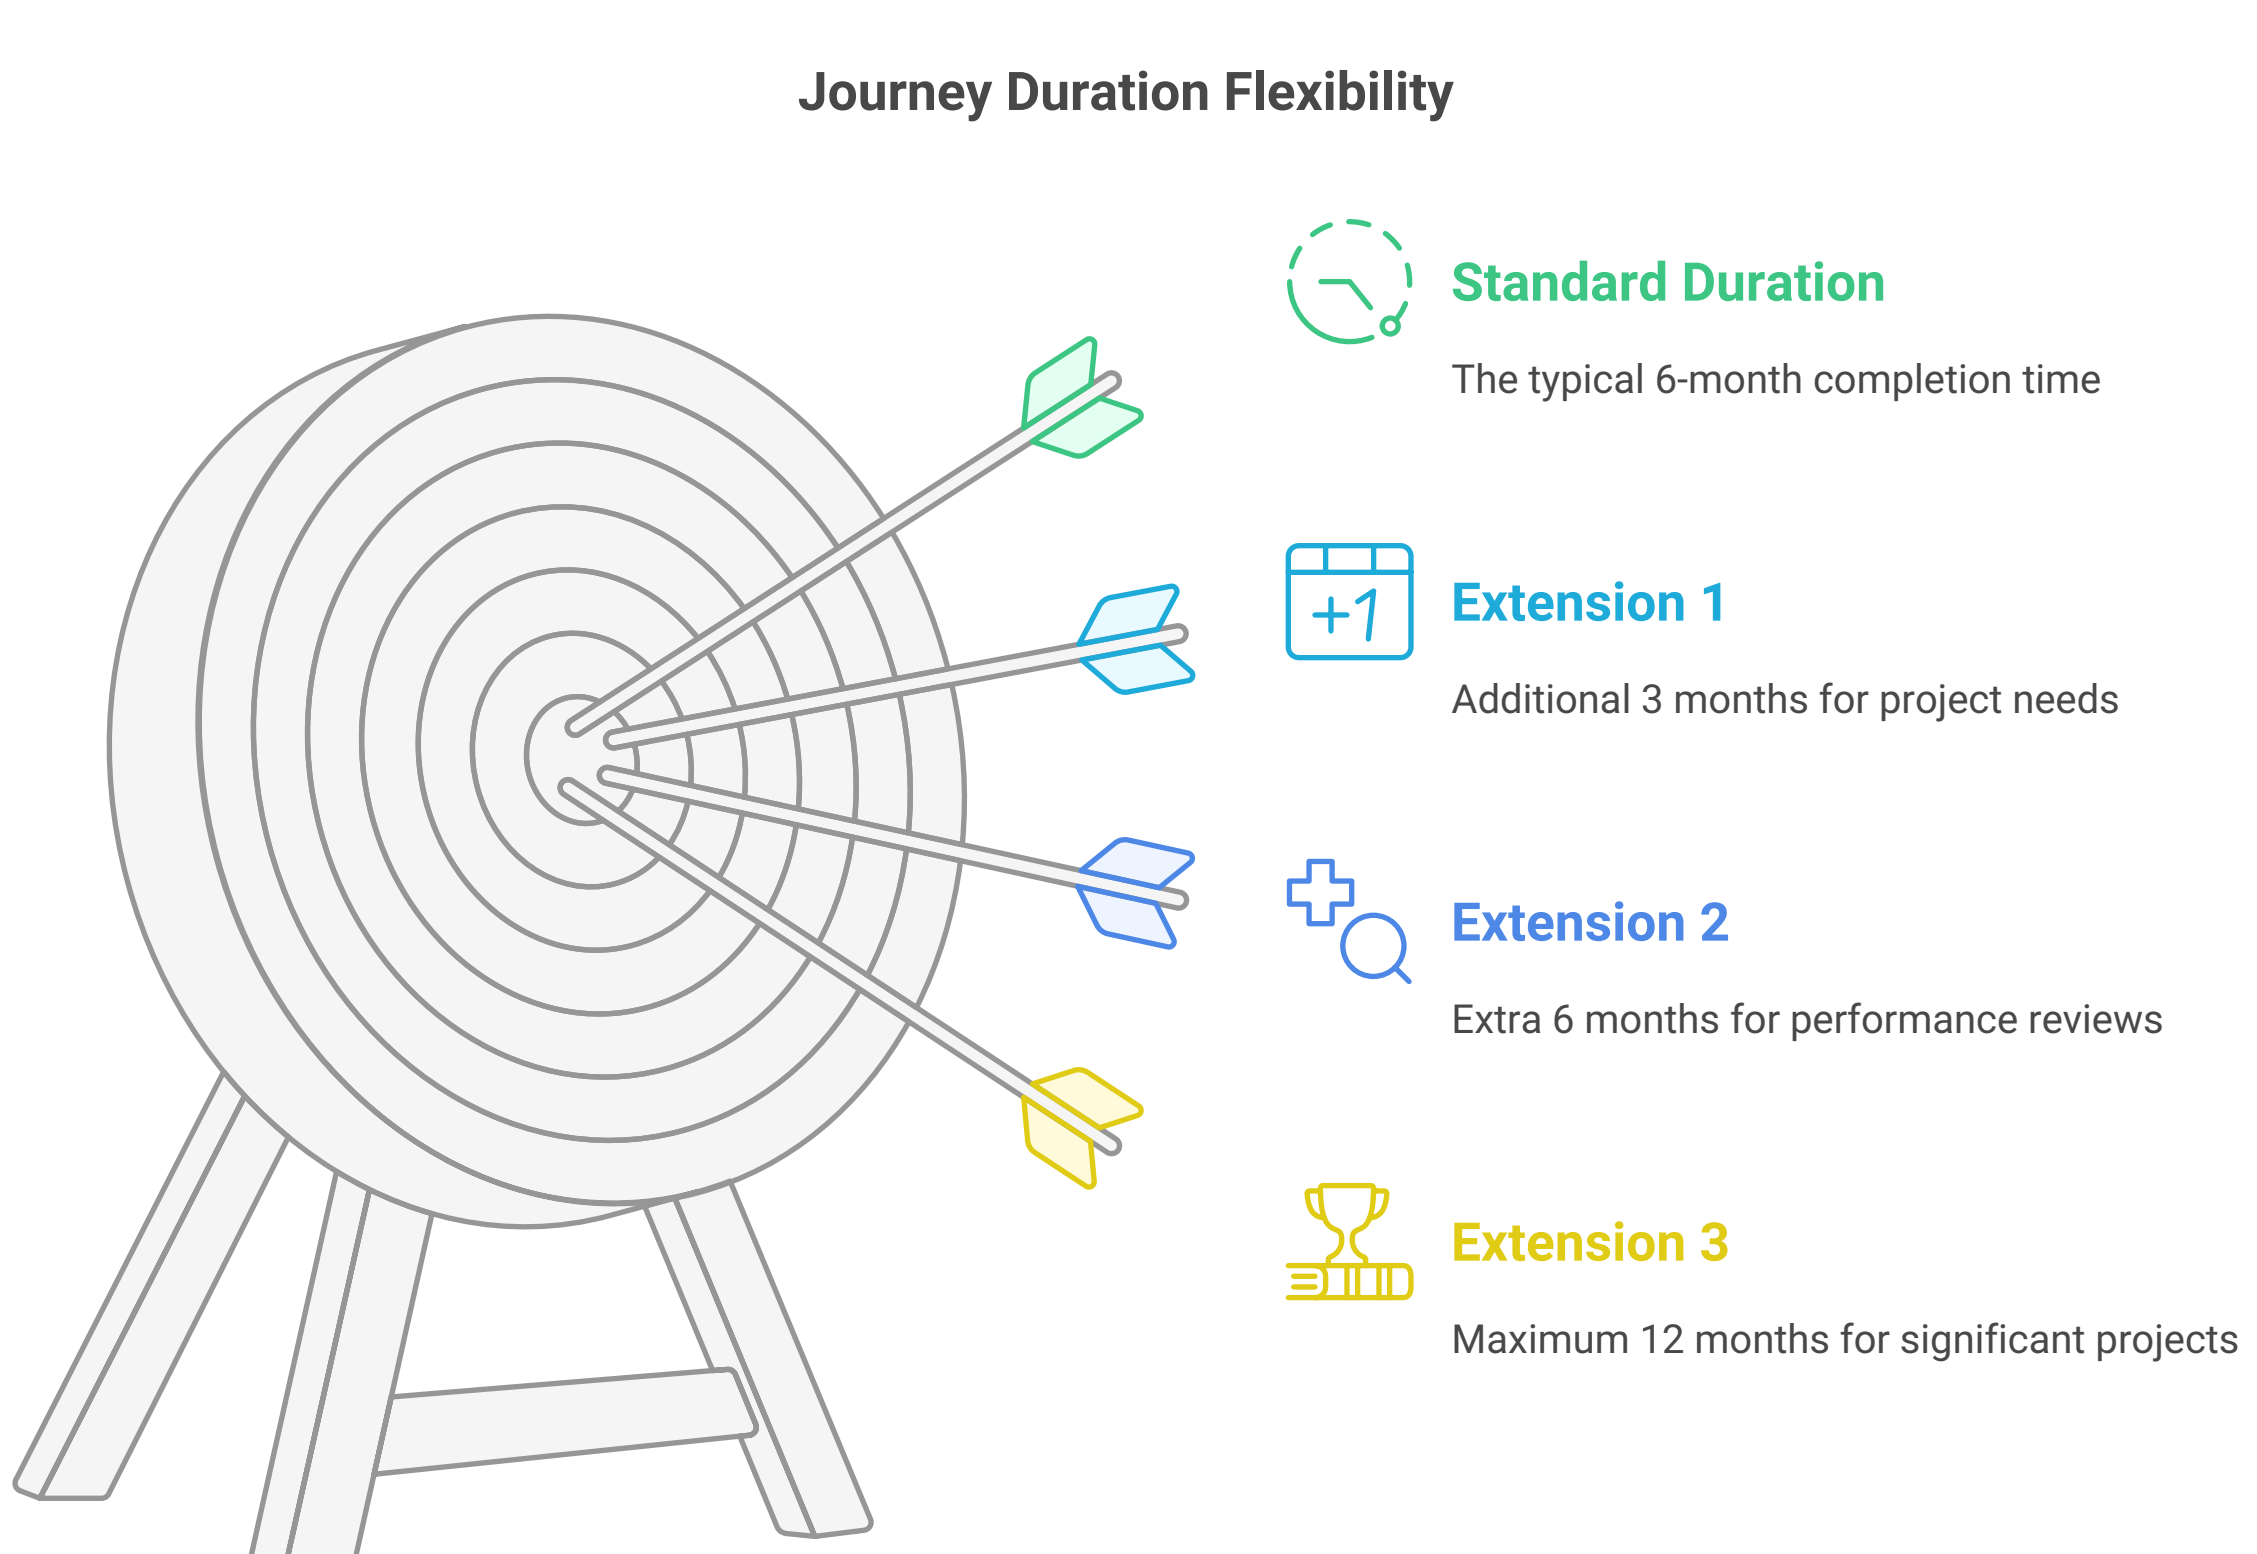

Breakdown:

- **3 credits** – Field immersion and lived experience documentation
- **3 credits** – Problem extraction, ideation, and validation
- **12 credits** – Project development, implementation, and evaluation

While the standard duration is 6 months,

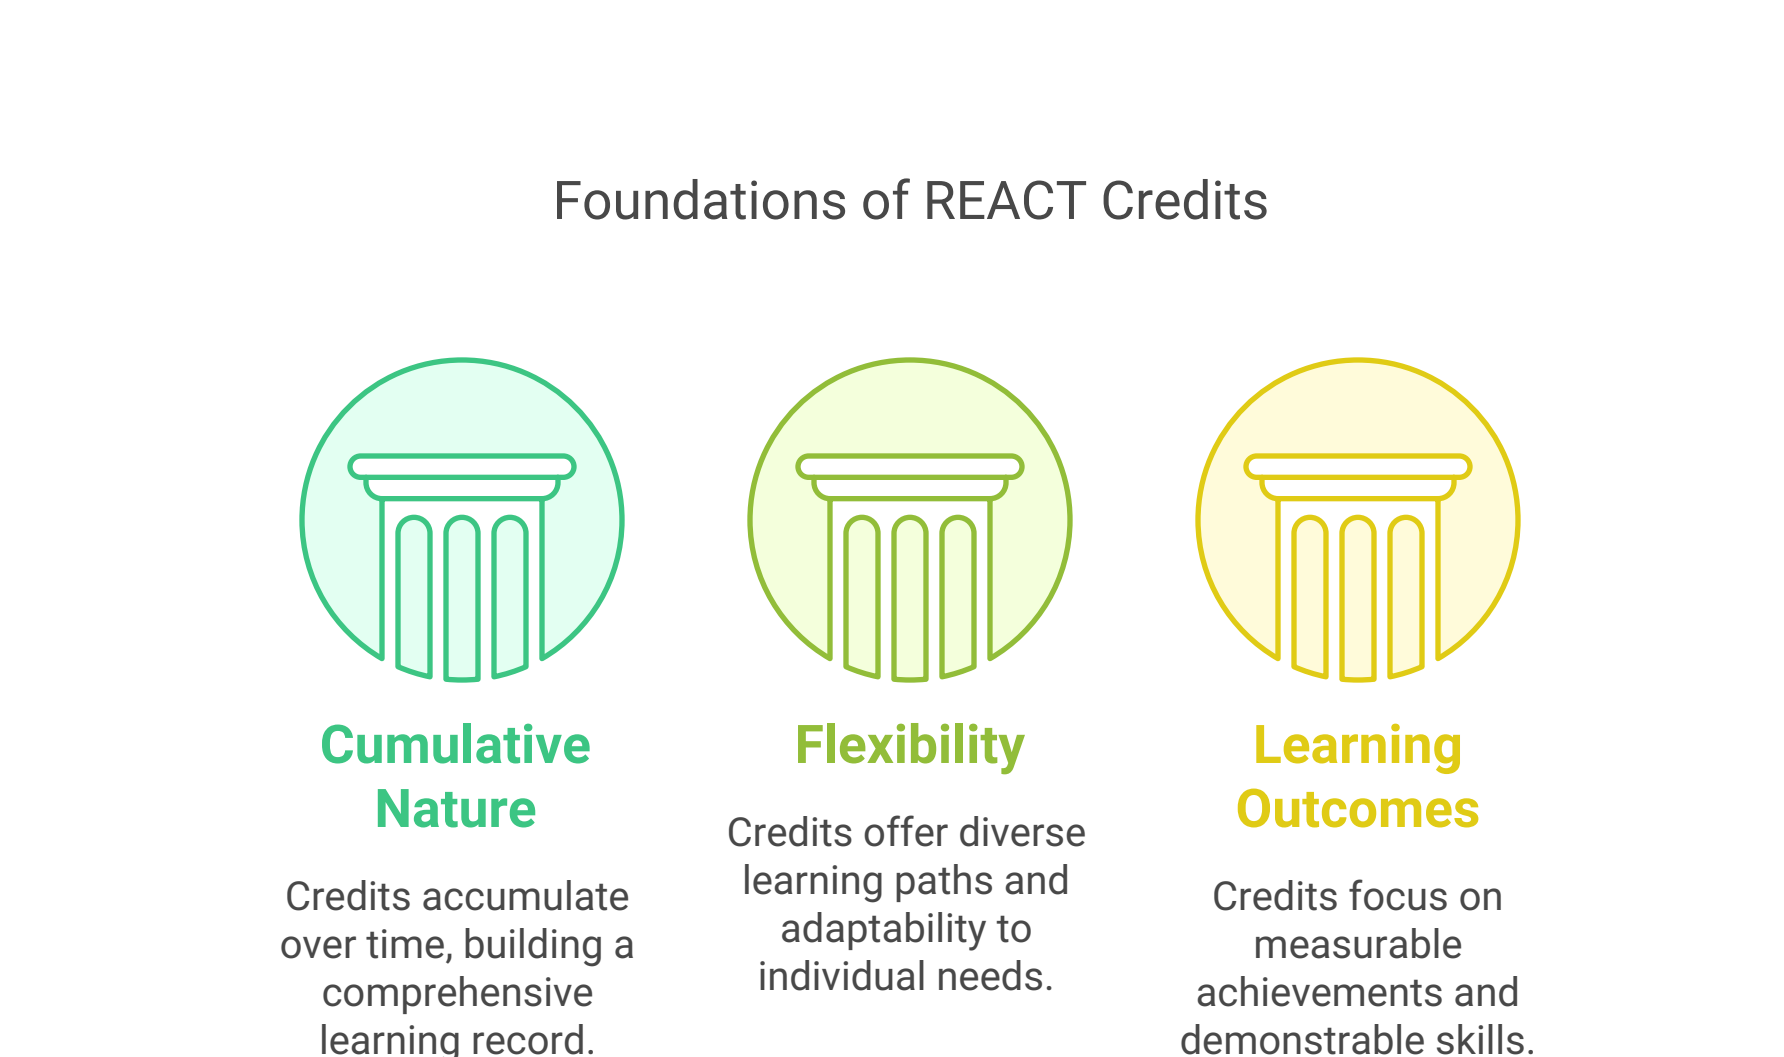

Participants typically complete this journey in 6 to 18 months. While the standard duration is 6 months, **extensions of 3, 6, or 12 months** are available based on project needs and performance reviews.

Inspired by National Standards
REACT credits draw inspiration from the **UGC's Academic Bank of Credits (ABC)** framework. They are:

- Cumulative
- Flexible
- Centered on demonstrable learning outcomes

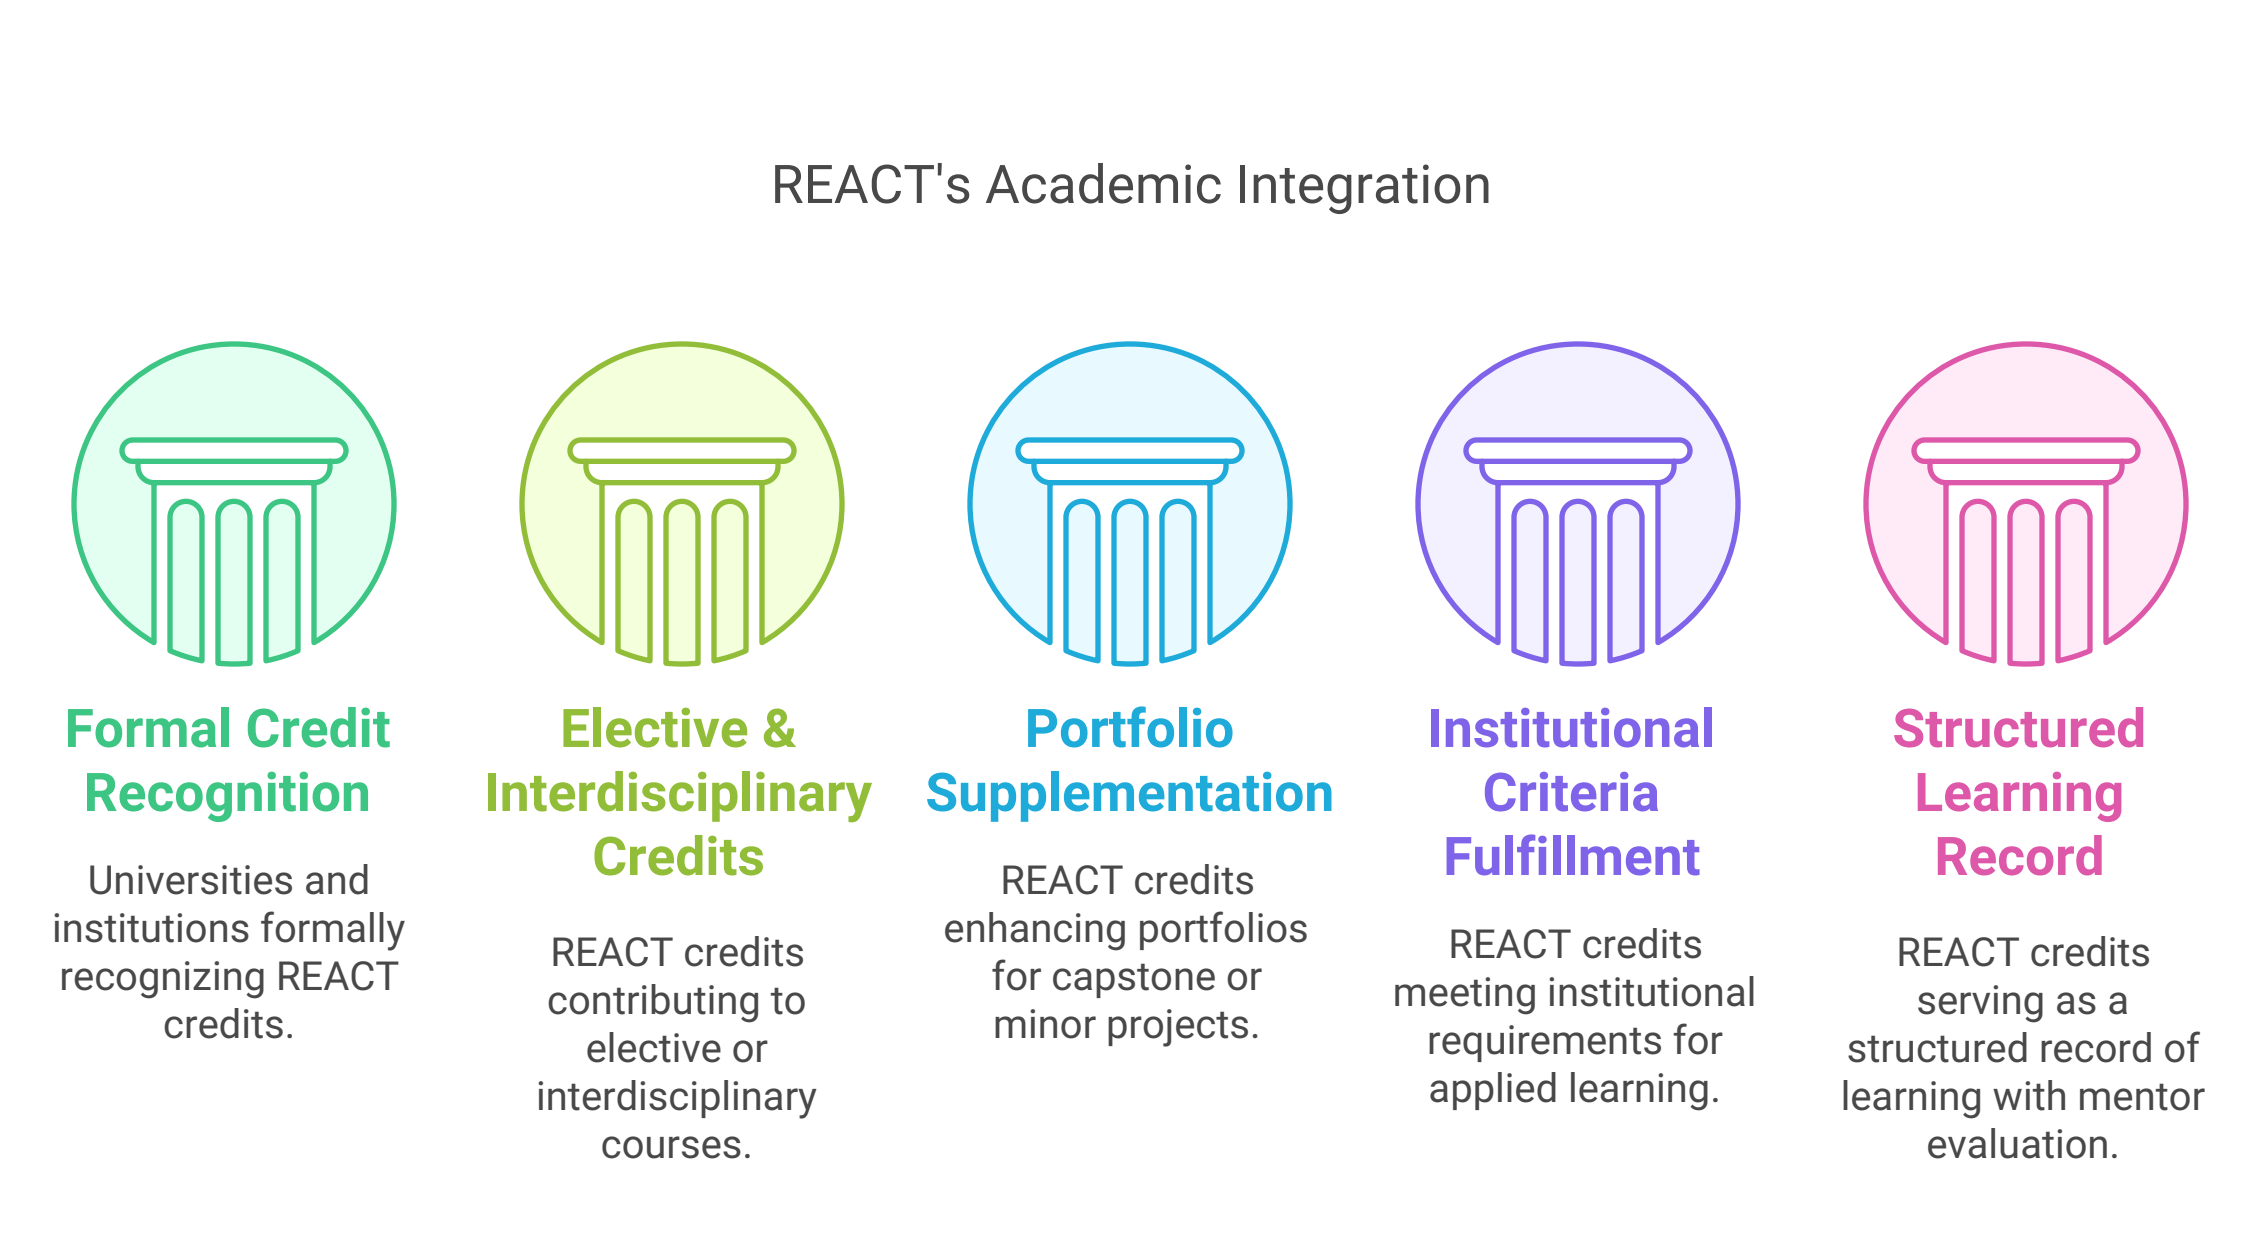

Though REACT does not award degrees, its structure supports academic integration where permitted.

Academic Mapping & Portability
REACT is in **active dialogue with universities and autonomous institutions** to explore formal credit recognition. Where agreements are in place, REACT credits may be used for:

- Contributing to elective or interdisciplinary credits
- Supplementing portfolios for capstone or minor projects
- Fulfilling institutional criteria for applied learning experiences

Even where formal transfer is not yet applicable, REACT credits serve as an **academically structured, mentor-evaluated record of learning**.

Recognition You Can Carry Forward
Every participant who completes the REACT Fellowship will receive:

- A **detailed certificate** with credits earned and performance grade
- **Mentor-reviewed feedback** and developmental report
- A **validated portfolio** of the problem solved and solution implemented

In an era where proof of practical problem-solving matters more than theory alone, REACT gives you not just recognition—but a **record of readiness**.
